

# COULD YOUR PET BE IN PAIN?

Since pets instinctively hide pain and can't tell us when they're hurting, it's up to us to recognize subtle signs of discomfort.

- Decreased appetite
- Increased vocalizing
- Limping
- Low energy
- Changes in grooming
- Avoiding stairs
- Aggression
- Hiding

**Age is not a disease, but pain is.  
Ask your veterinarian about the  
many ways to treat pain.**
